DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 17-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Davis et al. (U.S. Patent No. 5,896,382).

Referring to claim 17, Davis et al. discloses a method for managing a broadband modem (broadband modem, col. 6 lines 15-19, 64-67 and col. 7 lines 10-15), comprising: transmitting a discovery acknowledge signal (acknowledge, col. 9 lines 58-67) over a transmission medium in response (response, col. 9 lines 58-67) to receiving a discovery signal (message, col. 9 lines 60-65) from a client system (gateway, col. 9 lines 44-67); and entering a connect state (inherent, the response indicates a connect state).

Art Unit: 2664

Referring to claim 18, Davis et al. discloses the method of claim 17, further comprising specifying a data format (Figures 3 and 4 and respective portions of the spec.) that may be supported by the broadband modem among data formats specified in the discovery signal.

Referring to claim 19, Davis et al. discloses the method of claim 17, further comprising: transmitting a poll (polled, col. 8 lines 35-45) acknowledge message to the client computer system in response (response, col. 8 lines 35-45) to receiving a poll message; and entering a disconnect state (null response, col. 8 lines 35-45) if the poll message is not (does not have, col. 8 lines 35-45) received within a predetermined period of time.

Allowable Subject Matter

3. Claims 12-16 and 24-32 are allowed.
4. Claims 20-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
